Roadwork Notice

West Street Water Main Installation & Drainage Improvements

The DPW – Water Division has scheduled for the replacement of a water main on West Street starting on or about May 23, 2016. Water main installation will start near Tremont Street and continue to the intersection of Douglas Drive.

The project also includes the installation of some new drainage structures and pipe in preparation for the full reconstruction of this portion of West Street which is tentatively scheduled for calendar year 2017.

The construction is expected to take approximately 10 weeks, through the end of July. During construction expect daily detours and road closures, please refer to attached detour map. The road will remain open to local traffic, emergency vehicles, school buses and trash trucks.

During changeover to the new water main customers may experience temporary water shutoff and /or discolored or cloudy water. Additional information will be provided to residents with the schedule for changeover to the new main.

Please be aware that upon final paving, the road will have a five (5) year “no dig” moratorium.

If anyone is considering adding or upgrading utilities to their property please schedule it with the appropriate utility and also notify the DPW. If you have any questions please contact the DPW Office at 508-261-7335 or lazinheira@Mansfieldma.com. Please refer to www.mansfieldma.com for updates.
