

## Update on Construction at Mansfield Train Station 1/10/2019

The MBTA will be starting night work on the platforms at the train station this week. Scheduled work hours will be 9:00 pm – 5:00 am Sunday night through Friday morning. The work will start on the outboard side of the station and will move to the inbound side in a couple of weeks. The night work will continue for 4-6 weeks, however, the schedule is weather dependent and could be extended to 8 weeks if we get winter weather that affects their work.

Any questions, please call the DPW Office 508-261-7335.
