Press Release

August 13, 2019

On Saturday, August 10, 2018 at the Jimmy Buffett concert at the Xfinity Center, a Windham, NH man was arrested for Assault & Battery on a Person Over 60.

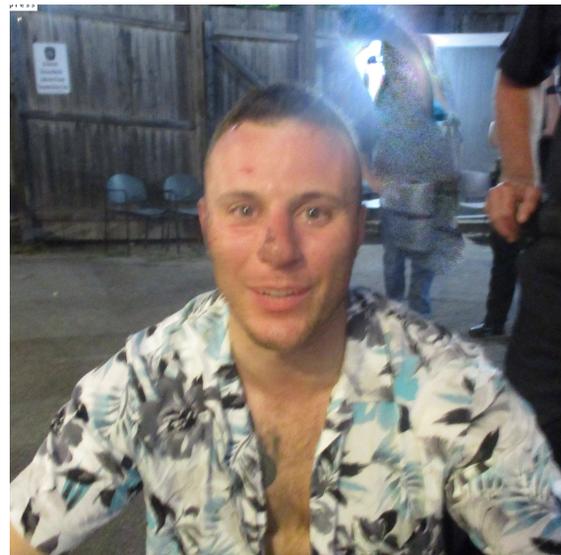

It is alleged that Lucas Notini, age 24, did assault and beat a Live Nation Security employee. The victim, who was providing security against unlawful entry to the venue, witnessed a man trying to break through the perimeter fence of the Xfinity Center. The security guard confronted the man and he responded by striking her in the head and then the arm as he ran by her toward the backstage area.

Several other security guards were able to stop the man before he made his way to the backstage area. Access to the backstage area is tightly controlled, with only credentialed employees, vendors, public safety personnel, and entertainers allowed. Two police officers witnessed the security guards running toward the backstage area and ran to see what was happening. The officers found Live Nation security personnel struggling to hold a non-compliant man on the ground.

The officers identified themselves to the struggling man and gave verbal commands to stop struggling and to comply. The man was then placed under arrest for Disorderly Conduct. After speaking with witnesses and the victim of the assault, who was visibly shaken and injured, Notini was additionally charged with Trespassing and Assault and Battery on a Person Over 60. The victim was treated at the on-site Medical Triage area.

The Mansfield Police Department and Live Nation have been working closely over the years to improve security at the venue. The recent events in the media in California and Ohio have further heightened security vigilance at the venue. The ongoing dialogue and preparation provided the layered security necessary to prevent Notini's unlawful access to the secured area. Respectfully,

Lt. Roy Bain

Lucas Notini
