			<b>Total tested positive since beginning:</b>	<b>164</b>
<b>Covid-19 Related Deaths</b>	<b>13</b>	(updated 6/22 0900)		

- **Reopening Massachusetts: Step 2 Phase II**

Today starts Step Two of Phase II of the Commonwealth's four-phase reopening plan, [Reopening Massachusetts](#), allowing additional industries to resume operations under sector-specific guidelines.

On May 18, the Administration [released](#) a four-phased plan to reopen the economy based on public health data, spending at least three weeks in each phase. Key public health data, such as new cases and hospitalizations, has been closely monitored and seen a significant decline allowing for Step Two of Phase II to begin today.

Businesses and sectors operating in Step Two of Phase II are subject to compliance with all mandatory safety standards.

The following businesses can reopen in Step Two of Phase II:

- Indoor table service at restaurants
- Close-contact personal services, with restrictions. Close Contact Personal Services are defined as any personal service typically delivered through close physical contact with the customer, including but not limited to:
  - hair removal services;
  - massage, body treatments, eastern treatment, energy therapies and other body work therapies;
  - skin care services; including peels, facials, serums, Botox and filler
  - nail care services; including nail salons
  - other hair services; including hair replacement services, scalp treating services
  - makeup salons;
  - makeup application services;
  - personal trainers; provided that in Phase 2 any indoor personal training service is limited to appointment-only training with only one customer (or two from the same household) allowed in the facility at a time;
  - tanning salons; including other businesses
- Retail dressing rooms, by appointment only;
- Offices, at 50 percent capacity

Full list and safety protocols available at [www.mass.gov/reopening](http://www.mass.gov/reopening).

Sector-specific guidance is available here:

- [Guidance for Restaurants](#)
- [Guidance for Close-Contact Personal Services](#)
- [Guidance for Other Industries](#)
- [Guidance for Sectors Not Otherwise Addressed](#)

Before these sectors can resume operations under the guidelines, businesses must meet all safety standards, create a COVID-19 control plan, and complete a self-certification.

- **New COVID-19 Testing Website Launched**

Last Friday, the Baker-Polito Administration launched a revamped testing website, “Get Tested MA,” as a more convenient resource for the public to find information on testing in one place. The website, available at [Mass.gov/gettested](http://Mass.gov/gettested), has information on who should get a test, what to do if an individual receives a positive test, and details on the different types of tests available.

It also connects with the Commonwealth's COVID-19 test site [locator](#), where individuals in need of a test can search for a test site convenient for them. The map allows for filtering among the more than 250 test sites by features including hours, testing for kids, and drive through options. Before seeking testing at a site, individuals should check the details of each site and call ahead if an appointment is necessary.

The Administration is also launching a new awareness campaign today for testing, including using electronic MassDOT and MBTA billboards throughout the state, as well as social media. The Administration continues to ramp up the Commonwealth's testing capacity and access to testing throughout the state. To date, over 926,000 molecular tests have been conducted on over 736,000 people in the Commonwealth.
