RE: Availability of Water Resources – 500 School St.

To Whom It May Concern,

The Town of Mansfield Water Division is able to provide sufficient water resources to operate the proposed 500 School St cultivation facility based on Community Gardens LLC's anticipated peak demand calculations of 5400 - 6000 gallons per day use.

In accordance with the Town of Mansfield Water Regulations and Fee Policy all water used must be metered and billed accordingly.

Sincerely,

Kurt E. Gaffney
Water Operations Manager
