Re: Electric Service at 500 School Street

Mr. Chorney,

The Mansfield Municipal Electric Department (MMED) has three phase electric service available in front of 500 School Street. Electric service can be supplied pursuant to MMED's Policy Governing Construction Requirements for New Developments – Residential and Commercial/Industrial found on MMED's website at https://www.mansfieldelectric.com/files/documents/policybooks/Construction%20Requirements%20FINAL%202020_9_11.pdf and in accordance with applicable laws, codes, and regulations.

Community Gardens will need to provide detailed specifications regarding the electric service desired to be installed at 500 School Street before the electric service can be designed by MMED. MMED only provides transformers 500 KVA or below – larger sizes will be provided (and owned and maintained) by Community Gardens.

Some MMED equipment has long lead times please contact me to start the process of designing the electric system as early as possible to avoid any delays. If you have any questions on the electric service please contact me at 508-261-7361.

Chris Cox
Electrical Engineer
