- [COVID-19 vaccinations for children ages 5-11](#)

Help Protect Your Child, Your Family, and Others

Getting a COVID-19 vaccine can help protect children ages 5 years and older from getting COVID-19.

- Vaccinating children can help protect family members, including siblings who are not eligible for vaccination and family members who may be at increased risk of getting very sick if they are infected.
- Vaccination can also help keep children from getting seriously sick even if they do get COVID-19.
- Vaccinating children ages 5 years and older can help keep them in school and help them safely participate in sports, playdates, and other group activities.

Help protect your whole family and slow the spread of COVID-19 in your community by getting yourself and your children ages 5 years and older vaccinated against COVID-19.

Protect Unvaccinated Children

Unvaccinated children ages 2 years and older should wear a mask in public spaces and around people they don't live with. Learn more about [protecting unvaccinated family members](#).

- [Get Vaccinated Against COVID-19 for individuals age 5+](#)

People age 5+ who live, work or study in Massachusetts can be vaccinated. Sign up and be notified of appointments near you. Use [VaxFinder.mass.gov](#) to search for appointments at pharmacies, health care providers, and other community locations.

Council on Aging staff is available to assist any vaccine-eligible seniors who need help navigating the scheduling process. Please call 508-261-7368.

COVID-19 Vaccination Clinic for 5-11 Year Olds

- [Testing for COVID-19](#)

CDC’s online COVID-19 Viral Testing Tool can help you understand your COVID-19 testing options. Get started: <https://bit.ly/covid-testing-tool>.

Testing is our best tool to identify those who have been exposed and slow the uptick in cases. You should get tested for COVID-19 if you have symptoms or you've been exposed to someone with COVID-19, even if you're fully vaccinated. If you’ve had COVID-19 in the past 3 months and you’ve been exposed to someone with COVID-19, you don’t need to get tested if you don’t have new symptoms. Testing is encouraged regardless of vaccination status.

<https://www.mass.gov/covid-19-testing>

- [Bristol county identified as an area of high transmission](#)

Bristol county has been identified by the CDC as an area of high transmission for COVID-19. The CDC recommends all people, no matter their vaccination status, wear masks indoors and in crowded outdoor settings in areas of substantial or high transmission. More information can be found [here](#).

County	COVID transmission level
Barnstable	High
Berkshire	High
Bristol	High
Dukes	Substantial
Essex	High
Franklin	High
Hampden	High
Hampshire	High
Middlesex	High
Nantucket	High
Norfolk	High
Plymouth	High
Suffolk	High
Worcester	High

Bristol County, Massachusetts

[State Health Department](#) 

7-day Metrics | [7-day Percent Change](#)

Community Transmission ● High
 Everyone in **Bristol County, Massachusetts** should wear a mask in public, indoor settings. Mask requirements might vary from place to place. Make sure you follow local laws, rules, regulations or guidance.

[How is community transmission calculated?](#)

November 17, 2021

Cases	1,165
Case Rate per 100k	206.12
% Positivity	4.7%
Deaths	14
% of population ≥ 12 years of age fully vaccinated	67.3%
