Make and Model number **MUST** be provided for each dishwasher and/or clothes washer (old and new).

Toilet rebate applies **ONLY** if replacing an exiting **5 gallon per flush or higher** with a new low flow toilet **1.6 gallon per flush or lower**.

## Why Should I Conserve Water?

**BECAUSE EVERY DROP COUNTS!** According to a U.S. Geological Survey, less than 1 percent of the World's fresh water is readily accessible. Start conserving today!

### HELPFUL TIPS:

Check your home for leaky toilets. Drop a leak detection dye tablet in rear toilet tank. If the dye becomes visible in the toilet bowl water after 10 minutes, you have a leak.

Install a low-flow showerhead and faucet aerator. Be a drip detective and repair leaky fixtures promptly.

Run only full size loads in dishwashers and clothes washers. Match the water level to the size of laundry load.

Upgrade to water-efficient fixtures to reduce water consumption and save cost.

Use a broom instead of a hose to clean your driveway and sidewalk and save water every time.

Avoid letting a hose run continuously while you wash a vehicle, use a water bucket instead.

Install a rain sensor on the irrigation controller so the lawn watering system won't run when it's raining.

### USING BIBB VACUUM BREAKERS TO PREVENT BACKFLOW WITH GARDEN HOSES

You may be using a garden hose connected to your home water supply to irrigate your lawn and garden, wash your car, bathe your pet and perhaps apply pesticides.

Did you know that in all of these uses the potential exists for backflow of contaminated water into your home, and from there, into the municipal water supply or your well? Using a simple, inexpensive bibb vacuum breaker (Figure 1) on your spigot can help prevent this hazard. This small, device attaches to a threaded water faucet and is available free to Town of Mansfield water customers (limit 2 per household).

Figure 1. Vacuum breaker installed on hose spigot.

## TOWN OF MANSFIELD WATER CONSERVATION PROGRAM

**WATER & MONEY**  
Help save our natural resources...

### CONSERVATION DEVICE FREE OFFER!

**Water saving devices are currently available to Mansfield water customers at no cost. Products include; low-flow faucet aerators, showerheads, leak detection tablets, and (newly added) hose bibb vacuum breakers to prevent backflow.**

**Take advantage of this free offer and start saving water and money today! Complete the back of this form, and bring it to the Public Works office in Mansfield Town Hall, Six Park Row, Mansfield, MA, to pick up your device (s).**

**Are you planning to replace a old toilet, appliance, or install a lawn irrigation system or home filtration system? STOP!!!**

**WE HAVE MORE GOOD NEWS. You may be eligible for 1 of 6 conservation rebates! Before making your purchase, see water rebate offers inside.**
