| <i>Mansfield Covid-19 Workflow</i>            | #           |                                       |
|---|-------------|---------------------------------------|
| <b>Positive COVID-19 under isolation</b>      | <b>46</b>   | (updated 02/11 08:00)                 |
| <b>Positive Cases recovered</b>               | <b>3992</b> |                                       |
| <b>Total tested positive since beginning:</b> | <b>4069</b> |                                       |
| <b>Covid-19 Related Deaths</b>                | <b>31</b>   | Last Covid death in Mansfield 1/28/22 |

**New COVID-19 cases per week  
March 7, 2020 - February 5, 2022**

## Vaccine Distribution in Mansfield- data through February 8, 2022

■ Population ■ Individuals with booster doses ■ Fully vaccinated individual, no booster ■ Partially vaccinated individuals

All data obtained from [Massachusetts COVID-19 vaccination data and updates | Mass.gov](https://www.mass.gov/info-details/massachusetts-covid-19-vaccination-data-and-updates)

\*The Centers for Disease Control and Prevention (CDC) now recommends that [Americans stay "up to date" with COVID-19 vaccines](#), rather than be "fully vaccinated." Up to date means a person has received all recommended COVID-19 vaccines, including any booster dose(s) when eligible. Fully vaccinated means a person has received their primary series of COVID-19 vaccines.

Adults who were up to date on their COVID-19 vaccinations had 5 times the protection against infection compared with adults who weren't vaccinated when the Omicron variant first began spreading in the United States.

Everyone ages 5 years and older should get up to date on their COVID-19 vaccines, including a booster dose for everyone 12 years and older when eligible.

Find a COVID-19 vaccine today:  
[www.vaxfinder.mass.gov](http://www.vaxfinder.mass.gov)

During the emergence of the Omicron variant, being up to date with COVID-19 vaccines provided protection against infection\*

**Adults who were unvaccinated had 5x higher risk of infection compared with adults who were fully vaccinated with a booster**
