<i>Mansfield Covid-19 Workflow</i>	#	
Positive COVID-19 under isolation	70	(updated 05/19 08:00)
Positive Cases recovered	4415	
Total tested positive since beginning:	4522	
Covid-19 Related Deaths	37	Last Covid death in Mansfield 3/22/22

New COVID-19 cases per week*
March 7, 2020 - May 14, 2022

* At home test results are not reported nor included in state data

Vaccine Distribution in Mansfield- data through May 10, 2022

■ Population ■ Individuals with booster doses ■ Fully vaccinated individual, no booster ■ Partially vaccinated individuals

All data obtained from [Massachusetts COVID-19 vaccination data and updates | Mass.gov](https://www.mass.gov/info-details/massachusetts-covid-19-vaccination-data-and-updates)

[Why Children and Teens Should Get Vaccinated Against COVID-19](#)

Just like adults, children and teens can get very sick from COVID-19. Children may also experience both short- and long-term health problems, and spread COVID-19 to others, including at home and school.

There is no way to tell in advance how children or teens will be affected by COVID-19. However, those with underlying medical conditions or who have a weakened immune system are [more likely to get severely ill from COVID-19](#).

Those without underlying medical conditions can also experience severe illness. In fact, almost half of children younger than 18 years old hospitalized with COVID-19 have no underlying conditions.

Children and teens who have already had COVID-19 should still get vaccinated. Emerging evidence indicates that people can get added protection by getting vaccinated after having been infected with the virus that causes COVID-19. So even if a child has had COVID-19, they should still get vaccinated. Read the science about [immunity from COVID-19 infection and vaccination](#).

- [Bristol County COVID-19 Community Level is identified as MEDIUM](#)

[COVID-19 Community Levels](#) are a tool to help communities decide what prevention steps to take based on the latest data. Levels can be low, medium, or high and are determined by looking at hospital beds being used, hospital admissions, and the total number of new COVID-19 cases in an area. Take precautions to protect yourself and others from COVID-19 based on the COVID-19 Community Level in your area.

In **Bristol County**, community level is **MEDIUM**. Stay [up to date](#) with COVID-19 vaccines. [Get tested](#) if you have symptoms. Wear a mask if you have symptoms, a positive test, or exposure to someone with COVID-19. Wear a mask on [public transportation](#). You may choose to wear a mask at any time as an additional precaution to protect yourself and others. If you are at [high risk for severe illness](#), consider wearing a mask indoors in public and taking [additional precautions](#). If you are immunocompromised, learn more about [how to protect yourself](#).

COVID-19 Community Level designations throughout Massachusetts today:

County	COVID-19 Community Level
Barnstable	High
Berkshire	High
Bristol	Medium
Dukes	High
Essex	High
Franklin	High
Hampden	Medium

County	COVID-19 Community Level
Hampshire	Medium
Middlesex	High
Nantucket	High
Norfolk	High
Plymouth	High
Suffolk	High
Worcester	High

What Prevention Steps Should You Take Based on Your COVID-19 Community Level?

Community Burden Levels		
Low	Medium	High
<ul style="list-style-type: none"> • Stay up to date with COVID-19 vaccines • Get tested if you have symptoms 	<ul style="list-style-type: none"> • If you are at high risk for severe illness, talk to your healthcare provider about whether you need to wear a mask and take other precautions • Stay up to date with COVID-19 vaccines • Get tested if you have symptoms 	<ul style="list-style-type: none"> • Wear a mask indoors in public • Stay up to date with COVID-19 vaccines • Get tested if you have symptoms • Additional precautions may be needed for people at high risk for severe illness
<p>People may choose to mask at any time. People with symptoms, a positive test, or exposure to someone with COVID-19 should wear a mask.</p>		

- [Get Vaccinated and Boosted Against COVID-19 for individuals age 5+](#)

The Centers for Disease Control and Prevention (CDC) recommends that [Americans stay "up to date" with COVID-19 vaccines](#), rather than be "fully vaccinated." Up to date means a person has received all recommended COVID-19 vaccines, including any booster dose(s) when eligible. Fully vaccinated means a person has received their primary series of COVID-19 vaccines.

Who is eligible to get a booster?

CDC recommends everyone ages 12 years and older receive a COVID-19 vaccine booster after completing their primary COVID-19 vaccination series. Some people can receive two boosters.

1st booster

Everyone age 12 and older can get a booster after they have had their primary vaccine series:

- At least 5 months after completion of an mRNA (Pfizer or Moderna) vaccine primary series
- At least 2 months after completion of a Janssen/J&J primary dose.

2nd booster

- Anyone age 50 and older may get a 2nd booster at least 4 months after their 1st booster
- Anyone age 12 and older with certain medical conditions may get a 2nd booster at least 4 months after their 1st booster
- Anyone age 18-49 years with certain medical conditions, and who **received Janssen/J&J** COVID-19 Vaccine as **both** their primary series dose and their booster dose, **at least 4 months** after the first Janssen booster dose

Three COVID-19 vaccines are authorized or approved for use in the United States to prevent COVID-19. You can mix and match vaccines. Your booster does not need to be the same vaccine brand as your original COVID-19 vaccination. If you are ages 12-17, you can only get a Pfizer booster. Pfizer-BioNTech or Moderna (COVID-19 mRNA vaccines) are preferred. You may get Johnson & Johnson's Janssen COVID-19 vaccine [in some situations](#).

The CDC has a new [COVID-19 Quarantine and Isolation \(Q&I\) Calculator](#) which offers customized information to address each unique situation. It takes the stress out of figuring when, and for how long, people with COVID-19 and close contacts need to stay home, get tested, and wear a well-fitting mask. The calculator provides important information about what precautions people with COVID-19 and their close contacts can take to protect loved ones and prevent COVID-19 in their communities. This online, mobile-friendly calculator provides a simple, easy-to-use way to help people follow CDC's [Quarantine and Isolation](#) guidance and get customized information that applies to their unique situation.

To use the tool:

- People with COVID-19 who do not have symptoms need to know the date they were tested for COVID-19
- People with COVID-19 who have symptoms need to know the date their symptoms began
- Close contacts need to know the date they last came into close contact with someone with COVID-19

- [Treatments for COVID-19](#)

Treatment is available for people who are at increased risk of severe disease, test positive for COVID-19 and have any symptoms, even mild ones (such as runny nose or cough). The sooner you start treatment, the better.

- **Call your doctor right away** to learn about your treatment options, OR
- **Call (508) 213-1380** to speak with a Gothams representative. If you're eligible for COVID-19 treatment, they can schedule an infusion appointment for you at one of their 7 sites in Massachusetts. Gothams COVID-19 Self-Referral Treatment Line is open Monday–Saturday from 8 a.m. to 6 p.m.
